## Monika Karczmarczyk

Visual artist based in Warsaw and Berlin, born in 1990, Poland.

I'm a Polish artist who utilises a variety of digital and performative techniques resulting from extensive research. At the core of my exploration lies the interconnectedness between body, object, and architecture. I delve into institutional spaces governed by specific rules, where participants are tightly controlled: hospitals, hospices, asylums, and prisons. These locations ritualise and localise behaviours that stray from societal norms. Essentially, they exist on the fringes of society, inhabited by those on the periphery or transitioning into alternative social or metaphysical states. I consider my artistic accomplishment in translating these states into a poetic visual language, embodying myself as a researcher with unique expertise.

## TANATOARCHITECTURE / REHEARSING TO MORTALITY

In this research project, I explore the impact of architectural spaces and their material and spatial organisation on the embodied experience of illness and the process of dying.

Architecture within the project is conceived as a multisensory, embodied experience rather than being limited to its physical form or aesthetic qualities. Drawing on Juhani Pallasmaa's ideas presented in "The Eyes of the Skin" (1996), architecture is understood as a bodily encounter, constantly reshaped by the interplay of human and non-human activities.

I am particularly interested in the interplay between absence and presence of the body in relation to illness. More precisely, I explore how the shift from absence to presence, from transparency to opacity, reshapes our perception and embodied experience of space during periods of dysfunction or illness.

The driving force behind this research is a personal encounter with the existential anxiety surrounding death and dying, which forms the basis for a multi-layered exploration of how architecture shapes our relationship with mortality. It represents a tender yet determined attempt to transform this anxiety into a poetic visual language that serves as a catalyst for both intimate reflection and broader cultural discourse.

## STILL POINT

three-channel AV installation, HD, loop, 2022

Still point shows a digitally rendered hand under white gauze bandages. Slowly the bandages come off, but they reveal nothing - no hand, as one initially suspects. The actual pictorial motif remains the bandage as a proxy for the process of healing, overcoming and transformation.

## CHOREOGRAPHY OF CARE

video, two-channel AV installation, 4K, 11'15", 2023

In Choreography of Care, two women perform a dance composition inspired by the gestures and movements of nurses in hospitals. Tenderness, care and sacrifice are the leitmotif of the dance performance. The stage is a barren room that is only open at the top. Light penetrates from above; the light source remains offstage - an allusion to the operating theatre and to a metaphysical beyond at the same time.

Choreographers: Tamara Zsófia Vadas, Júlia Vavra

Camera operator: Małgorzata Rabczuk

Cooperation: Geriatrics Clinic and Nursing Science Center

## DEATH OF THE PROTAGONIST

exhibition text

“For a long time after Ovid, it seemed redundant to talk about transformation — as it would have emerged as an episode of mere fantasy, a superficial fit of horror without the sacred content. Blanchot, the French philosopher, breathed new life into the concept with the help of a poem by Rilke. He reinterpreted the story of Orpheus and Eurydice so that the instance of looking back was no longer about the notion of love but about gazing upon the phenomenon of metamorphosis itself. This assigned the artist the impossible task of encountering absence, outlining its form so that We can confront it, at last, and use the stolen knowledge to describe what happens inside when the living becomes dead — and vice versa. The aim is not to dismantle nature’s order but to let the things surface that belong in the murky depths of the shadows. The mission is doomed to fail, yet it cannot be abandoned: curiosity spins us endlessly around this unreachable point.”- Fülöp Tímea

## THE ORDER

video, Full HD, 5'43", loop, 2017

The performance The Order shows a group of ten men who - as in a cultic ceremony - move thoughtfully with woolen blankets in their hands in a former prison and shake out their props at regular intervals. The resulting noise intensifies through synchronicity and becomes the protagonist of the performance. In its clarity, the piece makes reference to the synchronized everyday life of prison inmates and of individuals in state institutions. A clear contrast emerges between coldness and warmth, individual and collective, care and punishment.

## ORZEŁEK

video, Full HD, 10'07", loop, 2018

The video work explores the rich history and cultural significance of false eagles produced and sold by engravers from the Polish city of Łomża. Based on information gathered from the „do broni.pl” online forum, particularly from a thread dedicated to „Eagles of the Łomża Land,” this piece aims to investigate these distinctive military symbols.

Many of the Łomża eagles were created as replicas or interpretations of earlier, iconic designs, raising questions about authenticity and the transmission of cultural heritage.

## POTENTIALITY OF AN INCIDENT

video, Full HD, 5'37", 2017

The point of departure for the project was based on FBI instructional films from the sixties on how to use firearms. The video work portrays the operating principles as well as instructions for using the Glock 17 model, 9x19 caliber.

The presentation is performed by a former Special Services officer. Selected fragments of the instructional video emphasizes the subtlety of the relationship the body maintains with a manipulated object. The slow movements of the hand, which gently strokes the body of the weapon, showcasing individual points, contrasts with the knowledge we have of the object's purpose. Dissonance is produced in this tenderness and certainty of movement towards the object, the tension between the choreography and the potentiality of firing/using the tool according to its application.

## KLIMAWECHSEL

performance + live streaming, 2016

A site-specific project in collaboration with Laura Grudniewska, implemented in cooperation with the Museum of Wola in Warsaw.

The concept of climate in museums is particularly significant. The basic preventive action, providing protection of collections, is to control the microclimate parameters inside the building. The microclimate is, therefore, part of the museum's structure. Klimawechsel (climate change) is the injection of Wola's climate into the walls of the museum. Imperceptibly generated, the smell of the local specialty - fried chicken liver - is pumped into the ventilation system of the museum. The work circulates inside the building's structure.

## MIMICRY

video, Full HD, 4'16", 2016

Five women take formation under the loss of their personality. Social norms and ideal concepts of femininity, etiquette and decency are the geometric parameters.
